### LET OUR LEGACY BUILD YOUR WINNING TRADITION.

Incorporated in 1922, GARED has become a global advocate for rebuilding communities and rejuvenating play by providing equipment solutions to renovate green spaces and facilities. Our sports equipment has been the foundation of play in schools; collegiate, professional and international arenas; and on grassy fields in city parks and neighborhoods across the globe. We've been the backdrop to memories created by buzzer beaters, overtime free throws, frozen kickers, shot blocks, spikes, perfect serves, penalty kicks, and extra inning home runs more than any other brand. We've felt homecoming crowds stomp and seen fans cry in winning and defeat. We're even enshrined in the Basketball Hall of Fame. To athletes of all skills, from beginners to pro, GARED is more than a brand - it's part of their legacy.

GARED is a full-service manufacturer focused on creating optimal play experiences. Schools, recreation facilities, municipalities, and parks are being overwhelmed by challenges of creating safe and competitive environments that will maximize budgets without minimizing quality of play. Our PlayRX® program allows consumers to evaluate equipment to help prioritize replacement urgency and multiple year budget plans. It isn't just about selling products - it's about creating play solutions where athletes, coaches and administrations are satisfied. While our product line is commercial grade, there is a variation of price points to help maximize any budget need.

GARED is a proud supporting member of prominent organizations within the sports industry, and we participate in FIBA, NFHS and NCAA rulebook reviews. In addition, we meet with Congressional members annually to stress the importance of physical education funding, child obesity prevention, and to support passage of the PHIT Act at the SFIA's National Health Through Fitness Day. GARED sells its products through a network of authorized dealers across the United States and worldwide.

**CUSTOM BASKETBALL BACKSTOPS**

**ADJUSTABLE MAST HANGER**

Engineered hangers designed for strength and safety at critical attachment points provide unequal performance and reliability.

**CHANNEL SUPPORT**

4" structural steel top spreader supports our welded frames design allowing the weight of the backstop to assist with the locking of the brace.

**OFFSET DESIGN**

Our vertical support mast has an offset design allowing the weight of the backstop to assist with the locking of the brace.

**FULLY WELDED FRAME**

All single post designs under 31' incorporate a 6 5/8" diameter vertical support mast with fully welded frame for maximum rigidity. The mast is stabilized by rectangular tube side sway braces welded to the support channel and the mast. The sways are precision cut to match up perfectly to the vertical mast and horizontal top channel.

**DIRECT GOAL ATTACHMENT**

All designs incorporate a direct goal mount feature to distribute all stress or load on the goal directly to the vertical support mast. Basketball backstops utilizing this feature are backed by a lifetime backboard warranty.

**POWDERCOAT FINISH**

All steel has a high quality baked on powdercoat finish. Semi-gloss is our standard color, custom colors available. Colors shown below.

*We offer many options to provide each facility designer choices to best meet the needs and requirements of their customer. Our engineers have developed high performance equipment with structural integrity and versatility for all levels of competition.*

STRUCTURE					
DESIGN APPLICATION	Best for facilities with adequate space behind the backboard to brace the structure and no obstructions or clearance issues in front of the structure. This design offers maximum clearance above the court.	Great choice for those facilities with clearance issues over the court that will not allow front fold design, yet offers adequate space behind the backstop to allow rear folding for storage.	Best used in facilities designed without adequate space behind the backstop structure for rear bracing, and with no clearance issues over the court for front bracing to fold forward and up for storage.	This model is the perfect solution for the fieldhouse or gymnasium with large amounts of equipment, and limited space behind the backboard and/or other conditions that don't allow front fold, but still require folding the backstop up to a stored position.	Non-folding design with ceiling brace for those projects not requiring backstops to be moved and will not allow bracing to the wall.
